Panelists:

John Curran, ARIN
Tripti Sinha, University of Maryland
Doug Sicker, University of Colorado Denver

INTERNET2®

Influencing Tech Policy for Good

NSFNet, 1992

Internet, 2022

We no longer make tech policy implicitly through our network design decisions.

We need to work through various organizations: technical and non-technical, governmental, non-governmental, local, national, and international.

Why *this* community

Internet2 has nearly 500 members in all 50 states and several territories.

Deep roots in local, national, and international contexts.

Long history of setting standards and building networks for good.

We are 57th of 75,000 networks (CAIDA AS Rank, AS cone size).

Sharing, openness, and education is in our DNA.

Panelists

John Curran
    ARIN and Regional Internet Registry policy

Tripti Sinha
    Internet Corporation for Assigned Names and Numbers

Doug Sicker
    FCC policy
