Atlassian Update – 6th February 2018

Hi Everyone,

Thanks for your interest in this issue.

While this suggestion has gathered significant interest, we’re unable to implement all of the excellent suggestions you make. We appreciate the benefits of such requests, but don’t plan to work on this for the foreseeable future.

This suggestion will be reviewed in about 12 months time, at which point we’ll consider whether we need to alter its status.

Kind regards,

Jira Server Product Management

We collect Jira feedback from various sources, and we evaluate what we’ve collected when planning our product roadmap. To understand how this piece of feedback will be reviewed, see our Implementation of New Features Policy.

Allow multiple email addresses to be associated with a single Atlassian account

Description:
Some users would like to designate several email addresses on their Atlassian account specifically for site-specific notifications. This allows them to have a single identity that they can use as they work with different organizations across their careers, instead of having to spin up separate accounts with distinct full name, avatar, and other settings for each engagement.

This request is particularly popular with Bitbucket users, as this model is in use by some other popular dev tools products. In fact, this request is currently the 13th-highest voted issue for Bitbucket with nearly 500 votes and many comments that can be read here: [https://bitbucket.org/site/master/issues/7038/custom-email-routing-bb-6197](https://bitbucket.org/site/master/issues/7038/custom-email-routing-bb-6197)
Allow multiple email addresses to be associated with a single Atlassian account

Our product teams collect and evaluate feedback from a number of different sources. To learn more about how we use customer feedback in the planning process, check out our new policy.

Multiple email addresses per user.

Hi Everyone,

Thanks for your interest in [Product/Service].

While this suggestion has gained a lot of traction, I hope you all appreciate the benefits it provides.

This suggestion will be reviewed in the coming weeks.

Kind regards,

Jira Server Product Manager
